
What the grain decides

Store orders

item by store

history read by a pretrained model is enough when prices rarely move (M5)

Promotion and price

item by week, changed plan

the plan is needed; history alone sees 29% to 63% of promoted-week sales

Category plans

category or chain total

get the month's level right; plan-aware models 21% to 47% lower error than TimesFM

Choosing a model

any

score several months: one M5 month reversed the ranking
